SYLLABUS

Department of General Practitioner - 1»
Working curriculum disciplines « Outpatient - outpatient clinic cardiology »
Educational program 6 B 10101 - « General medicine »

1.	General information about the discipline		
1.1	code : OVP 6 30 1-5	1.6	Academic year: 2024 - 2025
1.2	Discipline name: Outpatient - outpatient clinic cardiology	1.7	Course: 6
1.3	Prerequisites : Fundamentals of General Medical Practice	1.8	Semester: 11-12
1.4	Postrequisites : 7th year internship course "Internal Medicine in General Practitioner"	1.9	Number of credits (ECTS): 3
1.5	Cycle: PD	1.10	Component: CCH
2.	Description of the discipline (maximum 50 words)		
Organization of cardiological care for the adult population of the Republic of Kazakhstan in outpatient settings. Algorithm for diagnostics and differential diagnostics of the most common cardiac diseases taking into account age characteristics, treatment, prevention, medical examination, rehabilitation. Disease management program for hypertension and CHF. Indications for hospitalization. Emergency and urgent medical care for adult cardiac patients. Communication skills, self-control, patient support.			
3.	Summative Assessment Form		
3.1	Testing	3.5	Coursework
3.2	Written +	3.6	Essay
3.3	Oral	3.7	Project
3.4	Assessment of practical skills +	3.8	Other (specify)
4.	Objectives of the discipline		
To train a general practitioner (GP) who has the required amount of knowledge, skills and practical abilities to independently carry out preventive, diagnostic,			

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>		<p style="text-align: center;">  SKMA -1979- MEDICAL ACADEMY АО «Южно-Казахстанская медицинская академия» </p>
<p style="text-align: center;">Department of Family Medicine</p>		<p style="text-align: right;">044 - 69 / ____ ()</p>
<p style="text-align: center;">Working curriculum of the discipline "Outpatient cardiology"</p>		<p style="text-align: right;">Page 2 of 37</p>

therapeutic and rehabilitation measures for cardiac patients within the competence of the GP in the primary health care system in accordance with the principles of evidence-based medicine and modern achievements in therapeutic, diagnostic and pharmaceutical technologies.

5.	Final learning outcomes (LO of the discipline)	
RO 1	Apply knowledge when using the healthcare information system to provide cardiological care to the adult population within the competence of the general practitioner, is proficient in the preparation of medical documentation, including electronic documentation.	
PO2	Applies diagnostic and differential diagnostic skills to the most common adult cardiac diseases	
PO3	Demonstrates knowledge in developing a treatment and prevention plan for the most common adult cardiac diseases according to Clinical Protocols.	
PO4	Makes decisions on providing emergency and urgent qualified medical care of the second category of complexity to adult cardiac patients.	
RO5	Evaluates the results of screening programs , participates in the implementation of preventive and widespread cardiovascular diseases, implementation of a disease management program for hypertension and CHF.	
RO6	Applies skills to effectively interact with patients, their family members and colleagues in a comprehensive assessment of the patient's condition to conduct an examination of temporary and permanent loss of ability to work and professional suitability of cardiac patients.	
5.1	RO discipline	Learning outcomes of the OP, which are associated with the discipline RO
	RO1	PO1 - Applies patient-centered care skills, uses interpersonal and communication skills with patients, their environment and colleagues in compliance with bioethical principles and patient rights
	PO4	
	RO6	
	PO2	RO2 - Organizes its activities within the legal and organizational framework of the healthcare system of the Republic of Kazakhstan to implement the policy of strengthening the health of the nation
	PO3	
	RO5	PO3 – Plans for continuous personal and professional growth to improve the quality of health care through self-assessment, self-education and lifelong learning
6.	Detailed information about the discipline	
6.1	Venue (building, auditorium):	

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>		<p style="text-align: center;">  SOUTH KAZAKHSTAN MEDICAL ACADEMY АО «Южно-Казахстанская медицинская академия» </p>

№ RO		
RO 1	Name of learning outcomes	Applies knowledge when using a health information system to provide cardiological care to the adult population within the competence of the general practitioner, is proficient in the preparation of documentation, including electronic documentation.
	Great	Fully knowledgeable about the use of the health information system (HIS) in providing cardiological care to the adult population within the competence of the general practitioner. Accurately and completely, correctly applies this knowledge in practice, when working with the HIS of the polyclinic on issues of cardiac patients and when preparing medical documentation, including electronic. Uses literature recommended in the syllabus .
	Fine	Does not fully possess all the necessary knowledge on how to use the information system health care when providing cardiological care to the adult population within the competence of the general practitioner, makes inaccuracies and mistakes that are corrected by the intern himself when working with the polyclinic's information system on issues of cardiac patients and when preparing medical documentation, including electronic documentation. Uses literature recommended in the syllabus in an incomplete volume.
	Satisfactorily	Does not fully possess the necessary knowledge to use the information system health care when providing cardiological care to the adult population within the competence of the general practitioner and makes mistakes when preparing medical documentation, including electronic documentation. Has difficulties when working with the outpatient health care system on issues related to cardiology patients. I have not fully completed the literature recommended in the syllabus .
	Unsatisfactory	Does not have the necessary knowledge of using the health information system when providing cardiological care to the adult population within the competence of the general practitioner and does not know how to work with the outpatient clinic's information system on issues related to cardiological patients. Has not studied the literature recommended in the syllabus .
	RO 2	Applies diagnostic and differential diagnostic skills to the most common Cardiological diseases in adults

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>			<p style="text-align: center;"> SOUTH KAZAKHSTAN MEDICAL ACADEMY АО «Южно-Казахстанская медицинская академия» </p>
Department of Family Medicine		044 - 69 / ____ ()	
Working curriculum of the discipline "Outpatient cardiology"		Page 11 of 37	

Great	Has the skills to use diagnostic and differential diagnostic algorithms most common cardiac diseases in adults. Collects complaints and anamnestic data of patients, clearly and consistently conducts objective examinations, draws up a plan of diagnostic studies in accordance with the Clinical Protocols, observing full list of examinations at the outpatient level. Pr applies knowledge obtained from scientific databases.
Fine	Has the skills to use diagnostic and differential diagnostic algorithms most common cardiac diseases in adults. Collects complaints and anamnestic data of patients, but does not follow the sequence in conducting objective examinations, draws up a plan of diagnostic studies in accordance with the Clinical Protocols, but skips some tests from the list of examinations at the outpatient level. Uses literature recommended in the syllabus and Clinical protocols .
Satisfactorily	Does not fully master the skills of using diagnostic and differential diagnostic algorithms for the most common adult cardiac diseases. Does not fully collect complaints and anamnestic data from patients, does not follow the sequence of objective examinations, and does not follow the recommendations specified in the Clinical Protocols. Has not fully worked through the Clinical Protocols and literature recommended in the syllabus .
Unsatisfactory	Does not have the skills to use diagnostic and differential diagnostic algorithms most common cardiac diseases in adults. Makes gross errors when collecting complaints and anamnestic data from patients, does not follow the sequence when conducting objective examinations and is unable to draw up an examination plan in accordance with the Clinical Protocols. Has not worked through the Clinical Protocols and the literature recommended in the syllabus .
RO 3	Demonstrates knowledge in developing a treatment and prevention plan for the most common Cardiological diseases in adults according to Clinical Protocols.
Great	Uses knowledge to develop a treatment and prevention plan for the most common cardiovascular diseases in adults. When developing a treatment and prevention plan, adhere to accurately and in full all the requirements specified in the Clinical Protocols, taking into account all individual characteristics of the patient, indications and contraindications of drugs.

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>

Department of Family Medicine		044 - 69 / ____ ()
Working curriculum of the discipline "Outpatient cardiology"		Page 12 of 37

		Takes into account interactions of drugs from different groups when combined. Apply knowledge obtained from scientific databases .
Fine		Uses knowledge to develop a treatment and prevention plan for the most common cardiovascular diseases in adults. When developing a treatment and prevention plan, it is allowed minor errors corrected by the intern himself, does not fully comply with the requirements, specified in the Clinical Protocols, taking into account all the individual characteristics of the patient, indications and contraindications of drugs. Takes into account interactions of drugs from different groups when combined. Uses literature recommended in the syllabus and Clinical Protocols .
Satisfactorily		When developing a treatment and prevention plan for the most common cardiac diseases adults make inaccuracies and do not adhere to the requirements specified in the Clinical Protocols with taking into account all the individual characteristics of the patient, indications and contraindications of drugs. Doesn't fully take into account interactions of drugs from different groups when combined. Not fully worked through the Clinical Protocols and literature recommended in the syllabus .
Unsatisfactory		When developing a treatment and prevention plan for the most common cardiac diseases adults make gross mistakes, do not adhere to the requirements specified in the Clinical Protocols, taking into account all the individual characteristics of the patient, indications and contraindications of drugs. Does n't read interactions of drugs from different groups when combined. Not worked out Clinical protocols and literature recommended in the syllabus .
RO 4		Makes decisions on providing emergency and urgent qualified medical care the second category of complexity for adult cardiac patients.
Great		Conducts examinations accurately, fully, and consistently when assessing the condition of patients and correctly determines the tactics of providing assistance. Fully masters the skills of using algorithms for providing emergency and urgent qualified medical care of the second category of complexity to adult cardiac patients according to Clinical Protocols . Knows how to evaluate the effectiveness of the measures provided and correctly monitors the functional state of patients after providing assistance . Apply knowledge obtained from scientific databases.
Fine		Conducts examination in full, but inconsistently, when assessing the condition of patients. Correctly determines the tactics of

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>			<p style="text-align: center;"> SOUTH KAZAKHSTAN MEDICAL ACADEMY АО «Южно-Казахстанская медицинская академия» </p>

		<p>providing assistance. Fully masters the skills of using algorithms for providing emergency and urgent qualified medical care of the second category of complexity adult cardiac patients according to Clinical Protocols . Allows non-fundamental errors corrected by the intern himself when assessing the effectiveness of the measures provided. Correctly monitors the functional state of patients after providing assistance . Uses literature recommended in the syllabus and Clinical protocols .</p>
Satisfactorily		<p>Incompletely and inconsistently conducts examination when assessing the condition of patients and makes inaccuracies in determining the tactics of providing assistance. Makes mistakes when using algorithms for providing emergency and urgent qualified medical care of the second category of complexity to adult cardiac patients according to Clinical Protocols . Does not have sufficient skills in assessing the effectiveness of the measures provided. Correctly conducts monitoring of the functional the condition of patients after providing assistance . I have not fully worked through the literature recommended in syllabus and Clinical protocols .</p>
Unsatisfactory		<p>Does not have the skills to conduct an examination when assessing the condition of patients and does not know how to determine the tactics of providing assistance. Makes gross errors when using algorithms for providing emergency care and emergency qualified medical care of the second category of complexity for cardiac patients adulthood according to the Clinical Protocols . Does not have the skills to evaluate the effectiveness of the measures provided. Has not studied the literature recommended in the syllabus and the Clinical Protocols .</p>
RO 5		<p>Evaluates the results of screening programs , participates in the implementation of preventive measures common cardiac diseases and implementation of disease management programs for hypertension and CHF.</p>
Great		<p>Applies skills in conducting screening studies, medical examinations, and rehabilitation patients with common cardiac diseases diseases and the implementation of management programs diseases of hypertension and CHF. Accurately and fully demonstrates knowledge of the assessment criteria effectiveness of screening studies and preventive measures and knows how to use them in practice. Conducts a comparative assessment of the effectiveness of PUS in patients with hypertension and CHF and dispensary patients with such diagnoses that are not included in the PUS. Apply knowledge obtained from scientific databases.</p>

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>	
<p style="text-align: center;">  SOUTH KAZAKHSTAN MEDICAL ACADEMY АО «Южно-Казахстанская медицинская академия» </p>	
Department of Family Medicine	044 - 69 / ____ ()
Working curriculum of the discipline "Outpatient cardiology"	Page 14 of 37

Fine	Applies skills in conducting screening studies, medical examinations, and rehabilitation patients with common cardiac diseases , but do not have sufficient skills in implementation of the disease management program for hypertension and CHF. Allows for inaccuracies in knowledge criteria for assessing the effectiveness of screening studies and preventive measures, has difficulty using them in practice. Makes minor mistakes in conducting a comparative assessment of the effectiveness of PUS in patients with hypertension and CHF and dispensary patients with such diagnoses that are not included in the PUS. Uses literature recommended in the syllabus .
Satisfactorily	Insufficient skills in conducting screening studies, medical examinations, rehabilitation of patients with common cardiac diseases diseases , does not have the skills to implement a disease management program for hypertension and CHF. Makes mistakes when determining the criteria for assessing the effectiveness of screening studies and preventive measures, does not know how to use them in practice. Has not fully studied the literature recommended in the syllabus .
Unsatisfactory	Does not have the skills to conduct screening tests, medical examinations, rehabilitation patients with common cardiac diseases diseases , does not have the skills to implement management programs for hypertension and CHF. Makes gross errors in determining criteria for assessing the effectiveness of screening studies and preventive measures. Did not work through the literature recommended in the syllabus .
RO 6	Applies skills to effectively interact with patients, their family members and colleagues in a comprehensive assessment of the patient's condition to conduct an examination of temporary and permanent loss of ability to work and professional suitability of cardiac patients.
Great	Has full communicative skills with a comprehensive assessment of the condition and degree limitations of life activity of cardiac patients to conduct an examination of the temporary and permanent loss of working capacity and professional suitability . Effectively establishes relationships with the patient's family members and colleagues when solving the patient's problem. Uses knowledge of effective communication when choosing rehabilitation measures and assessment of rehabilitation potential . It applies knowledge obtained from scientific databases .

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>			<p style="text-align: center;"> SOUTH KAZAKHSTAN MEDICAL ACADEMY АО «Южно-Казахстанская медицинская академия» </p>
Department of Family Medicine		044 - 69 / ____ ()	
Working curriculum of the discipline "Outpatient cardiology"		Page 15 of 37	

	Fine	Allows minor errors that are corrected by the intern himself when establishing an effective interactions with patients during a comprehensive assessment of the condition and degree of limitation of cardiac patients to conduct an examination of temporary and permanent loss of working capacity and professional suitability . Has an incomplete command of all the rules of effective communication with the patient's family members and colleagues when solving the patient's problem. Has difficulties with effective communication when choosing rehabilitation measures and assessing the rehabilitation potential. Uses the literature recommended in the syllabus .	
	Satisfactorily	Makes mistakes in establishing effective interactions with patients when comprehensive assessment of the condition and degree of disability of cardiac patients to conduct an examination of temporary and permanent loss of ability to work and professional suitability . Does not follow the rules of effective communication when communicating with the patient's family members. Has difficulty in teamwork with colleagues when solving the patient's problem. Does not fully possess the skills of effective communication when choosing rehabilitation measures and assessing rehabilitation potential. Has not fully studied the literature recommended in the syllabus .	
	Unsatisfactory	Does not have communication skills to establish effective interaction with patients during a comprehensive assessment of the condition and degree of disability of cardiac patients to conduct an examination of temporary and permanent loss of working capacity and professional suitability . Does not follow the rules of effective communication when communicating with the patient's family members and with colleagues when solving the patient's problem. Does not have the skills of effective communication when choosing rehabilitation measures and assessing rehabilitation potential. Has not studied the literature, recommended in the syllabus .	
10.2	Methods and criteria for evaluation		
Checklist for practical lesson			
		Grade	Evaluation criteria
1	Clinical analysis thematic patients		
		Great corresponds ratings: A (4.0; 95 - 100%)	Assessment parameters (each parameter is assessed according to the following criteria (assessment levels: lower - 4.5; upper - 5.0): fully completed the task, accuracy, consistency, ability to correctly assess and draw logical conclusions)

<p style="text-align: center;"> ОҢТҮСТІК-ҚАЗАҚСТАН MEDISINA AKADEMIASY «Оңтүстік Қазақстан медицина академиясы» АҚ </p>		<p style="text-align: center;">  SOUTH KAZAKHSTAN MEDICAL ACADEMY АО «Южно-Казахстанская медицинская академия» </p>

		C (2.0; 65-69%); C- (1.67; 60-64%); D + (1 , 33 ; 55-59 %) D (1 , 0 ; 50-54%)	worked through the materials of the Clinical Protocol.
		Unsatisfactory with corresponding assessments : FX (0.5 ; 25-49%) F (0; 0- 2 4%)	The intern is not familiar with the patient's problems, has poor communication skills. Has not worked through the materials of the Clinical Protocol.
3	Interpretation of laboratory and instrumental research results :	Matches ratings very well: A (4.0; 95-100%) A- (3.67; 90-94%)	The intern clearly and consistently describes each indicator, correctly analyzes changes in the ECG and laboratory test results, determines their clinical significance and provides a correct, complete justification for his/her conclusion.
		Matches ratings well: B+ (3.33; 85-89%) B (3.0; 80-84%) B- (2.67; 75-79%) C+ (2.33; 70-74%)	The intern clearly and consistently describes each indicator, changes in the ECG and laboratory test results, but allows for minor inaccuracies in the analysis of the identified changes, determining their clinical significance and substantiating his conclusion.
		Satisfactorily meets the assessments: C (2.0; 65-69%); C- (1.67; 60-64%); D+ (1.33; 55-59%) D (1.0; 50-54%)	The intern describes changes in the ECG and laboratory test results unclearly and inconsistently, makes mistakes in their analysis, and experiences great difficulty in determining their clinical significance and substantiating his conclusion.

		Unsatisfactory correspondence with the assessments: FX (0.5; 25-49%) F (0; 0-24%)	The intern ca n't describe ECG changes and laboratory test results .
Multi-point knowledge assessment system:			
Letter Grading	Digital equivalent of points	Percentage content	Traditional system assessment
A	4.0	95-100	Great
A -	3.67	90-94	
B +	3.33	85-89	Fine
IN	3.0	80-84	
IN -	2.67	75-7 9	
C +	2.33	70-74	
WITH	2.0	65-69	Satisfactorily
WITH -	1.67	60-64	
D+	1.33	55-59	
D-	1.0	50-54	
FX	0 , 5	25-49	Not satisfactory
F	0	0-24

Discipline Policy :

- requirements for interns, attendance, behavior, grading policies, penalties, incentives, etc.
- Come to classes in uniform (gown, cap) and with a phonendoscope and tonometer;
- Be punctual and responsible;
- Attendance at practical classes and SROPS is mandatory. Actively participate in the educational process ;
- A student who misses a class (unless exempted from classes by order of the dean) is given a grade of "n", classes missed for an unjustified reason are not made up, in the electronic journal in the cell next to the mark " n", a grade of "0" is given 2 days before the start of the exam.
- Missed classes for a valid reason are made up upon presentation of a supporting document. The student is required to provide a certificate to the dean's office no later than 5 working days from the date of its receipt and submits an application to the dean to receive a worksheet indicating the deadline, which is valid for 30 days from the date of its receipt in the dean's office. The grades received as a result of working the class are entered in the electronic journal in the cell next to the mark "n". In the absence of supporting documents or when they are submitted to the dean's office later than 5 working days after returning to study, the reason is considered invalid.
- Students who missed classes due to the dean's order to be released are not given an "n" grade, but are given an average grade for their academic performance, and the midterm assessment is completed.
- Each intern must complete all forms of SRO assignments in the form of individual and collective activities and submit them according to the schedule.
- All types of written work by students are checked for plagiarism.
- Be responsible for the sanitary condition of your workplace and personal hygiene.
10. Eating in classrooms is strictly prohibited.
 11. Observe safety regulations in classrooms .
 12. Comply with the internal regulations of the academy and clinical sites where classes are held.

13. Be tolerant, open and friendly towards fellow students and teachers.
14. Treats the department's property with care .
15. Turn off cell phones during school hours;
16. It is mandatory to perform shifts at the department's clinical sites (1 shift per week)

13	Academic policy based on the moral and ethical values of the academy		
	LEARNING OUTCOME ASSESSMENT POLICY : 1. The following types of control are used within the framework of the assessment system: 2. Current monitoring (CM) of students' academic performance is carried out by the teacher during classroom and extracurricular activities; 3. midterm control (MC) is carried out at least twice for each academic discipline; MC is part of the TC; 4. The final assessment (FA) is carried out in the form of an exam held upon completion of the study of the discipline; the rating for admission to the exam in the discipline must be at least 50 points (60%), which is calculated automatically based on the average assessment of the current assessment (40%) + the average assessment of the midterm assessments (20%). 5. Intermediate certification is carried out in two stages: acceptance of practical skills using the OSCE (objective structured clinical examination) method and testing. 6. In the context of DOT, the intermediate certification of students is carried out online: practical skills are assessed online on the Zoom , Webex platform; online proctoring technology is used for testing - a system for verifying identity and confirming the results of online exams .
