	literature from scientific databases.		
Good	Reproduces knowledge of basic disciplines, demonstrates knowledge and		
	understanding of the discipline and tasks of obstetrics with the required		
	accuracy and completeness, cannot apply basic knowledge in practice. Use		
	the literature recommended in the syllabus.		
Satisfactorily	Does not fully reproduce knowledge in basic disciplines, does not		
	demonstrate knowledge and understanding of the discipline and tasks of		
	obstetrics in full, cannot apply basic knowledge, does not allow accuracy a		
	errors in theoretical knowledge in practice. Has difficulties in solving		
	problems.		
Unsatisfactory	Does not reproduce knowledge of basic disciplines, does not fully		
	demonstrate knowledge and understanding of the discipline and tasks of		
	obstetrics with the required accuracy and completeness, incorrectly finds		
	solutions to problems of obstetrics, cannot apply basic knowledge, makes		
	gross mistakes in theoretical knowledge in practice. I haven't worked through		
	the main literature.		

CLO 2 It is capable of conducting diagnostics, treatment, prevention of complications and rehabilitation of patients during pregnancy, childbirth and the postpartum period on the basis of the principles of evidence-based medicine.

Score	Evaluation criteria						
Great	Demonstrates the application of the principles of evidence-based medicine						
	during the diagnosis, treatment, prevention of complications and						
	rehabilitation of pregnant women, women in labor and maternity. Applies						
	communication skills when communicating with the patient, informs about						
	the examination and treatment plan, receives consent. Conducts diagnostics,						
	treatment, prevention of complications and rehabilitation of patients during						
	pregnancy, childbirth and the postpartum period according to the clinical						
	protocols of the Ministry of Health of the Republic of Kazakhstan.						
Good	Demonstrates the application of the principles of evidence-based medicine						
	during the diagnosis, treatment, prevention of complications and						
	rehabilitation of pregnant women, women in labor and maternity. Applies						
	communication skills when communicating with the patient, informs about						
	the examination and treatment plan, receives consent. Conducts diagnostics,						
	treatment, prevention of complications and rehabilitation of patients during						
	pregnancy, childbirth and the postpartum period according to the clinical						
	protocols of the Ministry of Health of the Republic of Kazakhstan. Admits						
	unprincipled mistakes, corrected by the student himself.						
Satisfactorily	Partially demonstrates the application of the principles of evidence-based						
	medicine during the diagnosis, treatment, prevention of complications and						
	rehabilitation of pregnant women, women in labor and maternity. Does not						
	fully apply communication skills when communicating with the patient, does						
	not inform about the examination and treatment plan, does not allow						
	accuracy. Also, it does not fully diagnose, treat, prevent complications and						
	rehabilitate patients during pregnancy, childbirth and the postpartum period						
	according to the clinical protocols of the Ministry of Health of the Republic

12. Course policy						

#### 12. | Course policy

- 1. When passing the cycle at the department, student must wear a medical uniform: a robe, a cap, a mask.
- 2. Observe discipline, silence, ethics and deontology, subordination with the staff.
- 3. Observe the safety measures.
- 4. Take care of medical equipment and technical means of training at the department
- 5. Actively participate in the discussion of all SIW topics.
- 6. The student chooses the form of performing the IW from the suggested options.
- 7. All types of written works of students are checked for plagiarism.

# https://www.ukma.kz/ru/ Grading Policy 1. The assessment of students ' academic achievements involves the assessment of the current control, boundary control and final certification of students. 2. The current control of students 'knowledge is carried out within the framework of practical classes with the daily completion of the educational journal of students' progress and the electronic journal until the end of the week. A student who has missed a class, a lecture, and a SIWT (if he is not released from classes according to the order of the dean of the faculty) is marked " a» 3. Missed classes for a disrespectful reason are not worked out.

044-34/16

Students who missed classes for a disrespectful reason or did not work in an electronic journal next to the mark " a "are given a grade of" 0 " in the last week of the academic period.

- 4. Missed classes for a valid reason are worked out when providing an exculpatory document. The student must submit the certificate no later than 5 working days from the date of its receipt. In the absence of supporting documents or when submitting them to the dean's office later than 5 working days after leaving for study, the reason is considered disrespectful. The student submits an application addressed to the dean and receives a work-off sheet with an indication of the deadline, which is valid for 30 days from the moment of receiving it at the dean's office. Students who missed classes for a good reason in the electronic journal, next to the mark "a", are given the grade obtained as a result of working out the lesson. In this case, the "a" mark is automatically canceled.
- 5. Students who missed classes by order of the dean on release, the mark "a" is not set, the grade obtained as a result of working out the lesson is set.
- 6. At the end of each cycle, the department submits to the dean's office information about the progress and attendance of students.
- 7. The boundary control of students 'knowledge is carried out in the middle and at the end with the affixing of the results of boundary controls in the academic journal of academic performance and the electronic journal, taking into account penalty points for skipping lectures (skipping lectures in the form of penalty points are deducted from the assessments of boundary control). The penalty point for skipping 1 lecture is 1.0 point. A student who does not show up for the border control without a valid reason is not allowed to take the exam in the discipline. A student who does not appear for a foreign control for a valid reason, immediately after starting classes, submits an application to the dean, provides exculpatory documents (due to illness, family circumstances or other objective reasons), receives a work sheet.
- 8. The SIW score is set at the SIWT classes according to the schedule in the academic performance journal and the electronic journal, taking into account the penalty points for skipping SIW classes (skipping SIW classes in the form of penalty points are deducted from the SIW scores). The penalty point for skipping 1 SIW class is 2.0 points.

A student who has not scored a passing score (50%) on one of the types of controls is not allowed to take the exam in the discipline.

- 10. The correction of assessments of the current and boundary controls is carried out in case of technical errors in filling out the electronic journal on the basis of an explanatory note of the teacher (signed by the head of the department) with an indication of the reason; submission of supporting documents (the journal of academic performance, etc.); permission of the vice-rector for academic and methodological work.
- 11. Assessment of students 'knowledge is carried out according to the point-rating letter system. the system, according to which 60% is the current control, 40% is the final control.
- 12. The final score is calculated automatically based on the average score of the current control, the average score of the boundary controls and the score of the final control.
- 13. The final control is carried out in two stages if the Standard program for the discipline provides for the reception of practical skills. When conducting a two-stage final control, the reception of practical skills is carried out by the OSPE method/OSE with the involvement of independent examiners. Students who are not certified in the first stage are not allowed to take the second stage of the exam testing.
